REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The application contains a single independent claim 1. Claim 1 has limitation:

"A heat storage tank comprising a tank body for storing liquid while maintaining the warmth thereof and a housing having a fluid passage communicated with the interior of the tank body and allowing the liquid to pass therethrough, said tank body having an inner tank and an outer tank; said inner and outer tanks being welded together at a tank body port to define a sealed space between said inner tank and said outer tank; said sealed space being substantially a vacuum; and part of said housing being inserted and fitted into said tank body port, " as taught in Toyoshima et al. (US/6,718,925).

However, it is not shown or suggested a tank:

"wherein a welded portion between said inner tank and said outer tank is not encircled with said housing but opens outward in the radial direction of the said tank body port, and a gap extended in the axial direction of said tank body port is defined between the welded portion of said inner tank with said outer tank and a welded portion-opposed part of said housing opposed to said welded portion in the axial direction of said tank body port; said gap having a size incapable of substantially retaining water drops. "

The utility is that this feature prevents rusting of welded portion.

For the above reasons claim 1 is allowed and for at least these reasons all remaining claims are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
